

PROGRAMME SPECIFIC OUTCOMES

PSO	STATEMENT
PSO1	Core System Architecture & Emerging Technologies : Ability to analyze, design, and develop scalable IT solutions, software systems, and network architectures by applying core computing principles, data structures, and modern cloud, AI, or cybersecurity methodologies.
PSO2	Tech-Driven Problem Solving for Societal Benefit: Ability to utilize modern IT tools, agile frameworks, and project management principles to solve complex, real-world problems, creating secure and innovative applications that address ethical, environmental, and societal challenges.
